Steel Foot Pedal Control Option for AIR-THL

MODEL AIR-TFP

Ergonomic Solutions / Air Corner Tilters

Product image unavailable

PRODUCT OVERVIEW

The air corner tilter is a floor level multi-ply airbag powered tilter that provides ergonomic loading and unloading of bulk containers, gaylords, or crates. It is accessible by either pallet or fork truck and is activated by a hand operated control lever. The air bag inflates tilting and the material shifts to the corner of the container where it can be easily removed by manual or mechanical means. The regulator is factory present to begin rotating the container when the weight reaches approximately 900 pounds. Includes adjustable vacuum pick-up wand holder (3-1/2" inside Diameter) and provides 12” of adjustment to accommodate various container heights.

KEY FEATURES

- Provides ergonomic loading and unloading of bulk containers
- Accessible by pallet or fork truck and is activated by a foot pedal
- Adjustable air regulator to a predetermined pressure
- The pressure adjusts to the weight of your application
