Steel Hydraulic Hand Pump with Aluminum LED Light Package Trailer Lock System Blue / Yellow

MODEL TL-200-HP-F

Loading Dock Equipment / Trailer Lock Systems

PRODUCT OVERVIEW

The trailer lock system is designed for installation directly in front of the loading dock. The electric hydraulic system captures the ICC bar on the back of semi-trailers. To ensure maximum safety the unit comes standard with an accumulator that allows the lock to follow the trailer up and down as it is loaded/unloaded. A beeper and flashing light warns the operator if the lock does not engage the trailer properly. A visual indication of the restraint's status is shown at all times by the traffic light outside and the control panel inside. It comes standard with light package, control panel, three (3) large visual signs, and LED bulbs.

KEY FEATURES

- Hydraulic system captures the ICC bar on back of semi-trailers
- Beeper and flashing light warns if the lock does not engage properly
- Traffic light outside for visual indication is shown at all times
- Includes light package, control panel, and three (3) large visual signs
